

THE SYNAGRO ADVANTAGE

Developed over more than 25 years serving unique industry needs, Synagro offers a full suite of services to help you transform natural waste challenges into sustainable solutions, from efficient collection and conversion to the beneficial reuse of planet-friendly options.

Synagro is currently providing these sustainable waste conversion services to the pulp and paper industry:

- Beneficial soil amendment for improving local agriculture lands and reducing the use of chemical fertilizers
- Biofuels for direct-burn energy generation
- Renewable energy via anaerobic digestion and electrical cogeneration
- Waste segregation and recycling of higher-value components

It's waste transformation and reuse on your terms with the capability to perform mobile- and stationary-dewatering – from single-event needs to regular maintenance – we bring you complete flexibility and the comprehensive level of service you require.

WASTE RECYCLING WITH BENEFITS

Synagro has more than 25 years of experience helping customers manage diverse residuals and wastewater needs through a broad service offering.

Drawing on significant pulp and paper industry expertise and with a reputation for cost-effective innovation, Synagro is the undisputed category leader at helping you:

- Lower operating costs by streamlining waste-handling practices;
- Meet zero-landfill and other corporate sustainability objectives; and
- Minimize risk of non-compliance with a single source of proven responsibility and reliability.

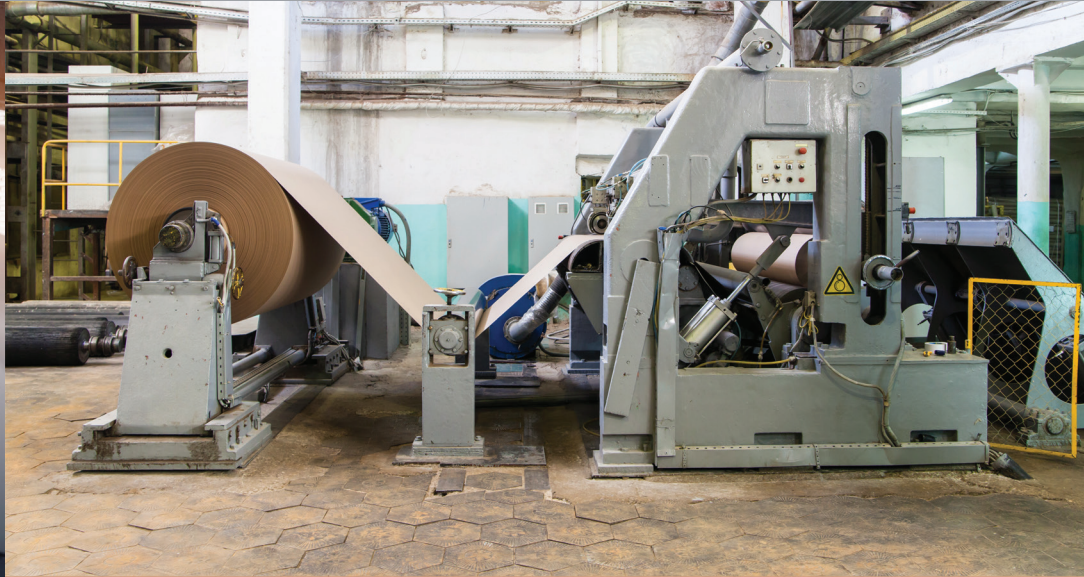

THE LOWEST COST.THE HIGHEST QUALITY.

You want to focus on growing your business – not attending to the waste materials it creates. At Synagro, we address all of the needs posed by byproducts management, and we do it with your balance sheet in mind.

Our high-quality, low-cost offerings have made us the industry leader in converting natural waste challenges into sustainable goods that benefit people and the planet. Nationwide, a growing number of pulp and paper industry clients rely on us to manage all of their byproduct streams because Synagro provides:

- Diverse capabilities, from daily operations to emergency services, as well as periodic dewatering and maintenance;
- Lowest-cost alternative to large-volume waste capture and beneficial use conversion; and
- Turnkey service programs and nationwide resources.

Partnering with Synagro will also help enhance your credentials as a socially responsible organization concerned with both the economic and environmental bottom line.

PARTNER WITH SYNAGRO

When you are looking for the best biosolids and residuals solutions to serve your business and your community, Synagro has the proven solutions to help you succeed. Municipalities and industrial organizations like yours that want to make the best use of organic waste turn to Synagro. Across the United States, Synagro applies expertise and innovative technology to provide resource recovery solutions that meet the unique needs of customers and communities.

WHO WE ARE

Synagro is the country's preeminent provider of biosolids and residuals solutions services since 1986.

Headquartered in Baltimore, Maryland, we employ over 800 people in 34 states and service more than 600 municipal and industrial water and wastewater facilities.

HOW WE CAN HELP

Our professional and experienced staff members provide solutions for all aspects of biosolids and residuals management needs, from land permitting and soil analysis by our nationwide technical services team to facilities development by our in-house engineering staff. Synagro provides a comprehensive scope of customer focused solutions.
