

We have designed, built and operated more than 60 biosolids dewatering and processing facilities.

Our solutions are based on the needs of the client and the situation. Synagro is not tied to a single technology, supplier or process and is always looking for the best, most cost-effective resolution.

DESIGNING FOR LONG-TERM SUCCESS

When it comes to designing and building a facility to address your unique biosolids management needs, Synagro's success with dozens of DBO and DBOO facilities proves that we understand the time, cost, resource and regulatory considerations that are critical for long-term success.

Whether you need a comprehensive or targeted solution, our team of experts will help you achieve optimal cost, save time and improve energy efficiency at every stage of the process – from concept to implementation to long-term management.

THE SYNAGRO ADVANTAGE

DBO benefits include:

- In a word, **simplicity**. Our DBO model provides municipal customers with proven private-industry expertise within their own facilities.
- Valued long-term relationships beyond project completion – offering as much day-to-day management as needed, whether in the form of workforce-placement or specialty services.
- Municipal clients simply generate biosolids and Synagro takes care of the rest, including permitting services, engineering and design, appropriate technology selection, construction and start-up to long-term, state-of-the-art operations.

DBOO benefits include:

- In a word, **affordability**. Synagro designs streamlined facilities with the right balance of capacity and redundancy to meet your needs.
- Expertise in capital market segments as well as tax-based grants and private-industry incentives often unavailable to municipalities.
- Single-party responsibility allowing for risk transference from municipality to Synagro.

Serving Public-Sector Clients Through DBOO

In a word, **leadership**. Synagro is the best professional and experienced partner for your day-to-day biosolids challenges, with state-of-the-art facility options for any situation and available back-up disposal options.

PARTNER WITH SYNAGRO

When you are looking for the best biosolids and residuals solutions to serve your business and your community, Synagro has the proven solutions to help you succeed. Municipalities and industrial organizations like yours that want to make the best use of organic waste turn to Synagro. Across the United States, Synagro applies expertise and innovative technology to provide resource recovery solutions that meet the unique needs of customers and communities.

WHO WE ARE

Synagro is the country's preeminent provider of biosolids and residuals solutions services since 1986.

Headquartered in Baltimore, Maryland, we employ over 800 people in 34 states and service more than 600 municipal and industrial water and wastewater facilities.

HOW WE CAN HELP

Our professional and experienced staff members provide solutions for all aspects of biosolids and residuals management needs, from land permitting and soil analysis by our nationwide technical services team to facilities development by our in-house engineering staff. Synagro provides a comprehensive scope of customer focused solutions.
