## **Synagro to Be Featured on Episode of *American Farmer* to Air in September**

### **Focus on Synagro's Compost as Nutrient and Carbon Resources for Farmers and Growers**

**BALTIMORE, Maryland, August 28, 2018** – [Synagro Technologies, Inc.](#), one of the largest private composters in the United States, is pleased to announce the initial airings of an episode of DMG Productions' *American Farmer* will broadcast on Tuesday, September 4, 2018 at 8:30 a.m. ET on RFD-TV. The airing will be repeated on October 3 and 10, 2018 at the same time. The show will describe how Synagro applies its expertise and innovative technologies to help municipalities and commercial customers across the country transform natural-waste challenges into sustainable solutions.

"Synagro's primary business is the collection and processing of organic wastes – predominantly organic waste from water reclamation facilities. Through composting, we produce AllGro® compost and from drying, Granulite® fertilizer, and we distribute both to farmers across the country," said Bob Pepperman, director, Product Sales & Marketing, Synagro. "Synagro brings broad North American experience in composting. We operate six composting facilities and nine fertilizer plants in the United States. Not only that, we have the financial strength to design, build, finance, operate and maintain a facility; and we have a cadre of sellers out marketing the end products to the users."

Viewers will learn how AllGro compost can improve soil health, reduce irrigation requirements, replace expensive chemical fertilizers and sustain vigorous crop performance.

"Composting restores land that has been disturbed by extractive industries or natural disasters," said Jennifer Tierney, senior producer, *American Farmer*. "It also improves soil health and reduces dependence on chemical fertilizers. We are excited to explore how Synagro supports crop performance in a sustainable manner."

### **About *American Farmer***

*American Farmer* is a breakthrough program on a mission to showcase the latest advancements in agriculture and farming. From seed to harvest, livestock and more, our producers have traveled the country covering the people, places and issues impacting all areas of farm country. [American Farmer](#) airs Tuesdays at 8:30 a.m. ET on RFD-TV. Check your local listing for show times.

## About Synagro

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro's leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations.
