Synagro Awarded Contract to Operate City of Windsor, Ontario's Dryer

The City of Windsor, Ontario, Canada has selected Synagro operate and maintain its biosolids drying and pelletization facility for up to the next twenty years.

BALTIMORE, Maryland, June 27, 2019 – [Synagro Technologies, Inc.](#), the preeminent provider of biosolids and residuals solutions services in North America, today announced that it has been contracted to operate and maintain Windsor Biosolids Pelletization Facility (WBPF) owned by the City of Windsor, Ontario, Canada, effective June 1, 2019.

The 200-wet-tons-per-day biosolids management facility was originally placed into service in 1999. Synagro will be responsible for transportation of dewatered biosolids from Windsor's two wastewater treatment plants and for reliably processing those biosolids into a Class A fertilizer and renewable fuel product that is used throughout Southwest Ontario. WBPF will provide Windsor with a long-term, reliable, sustainable solution to its biosolids management needs.

"Synagro is excited to welcome Windsor as another Canadian partner and into our portfolio of business in Ontario. The WBPF has a highly engaged, dedicated staff which will benefit from the additional drying facility experience and resources Synagro will bring to the project," said Pam Racey, vice president of project development, Synagro.

About Synagro

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro's leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations.
